Jean-Philippe Rameau, *Treatise on Harmony*

CONTENTS

Preface xxxiii

BOOK ONE:
On the Relationship Between Harmonic Ratios and Proportions

1. On Music and Sound 3
2. On the different ways in which the relationship between Sounds can be known to us 4
3. On the origin of Consonances and on their relationships 5
   
   I. On the source of Harmony or the fundamental Sound, 7
   II. On the Unison, 8
   III. On the Octave, 8
   IV. On the Fifth and the Fourth, 13
   V. On the Thirds and the Sixths, 15
   VI. Summary of the contents of this Chapter, in which the properties shown in the preceding Demonstration are represented on a single String, 17

4. Remarks on the properties of the Harmonic and Arithmetic Proportions 20
5. On the origin of Dissonances and on their relationships 27
6. On doubled Intervals, and especially on the Ninth and the Eleventh 34
7. On Harmonic Division, or on the origin of Chords 35
8. On the inversion of Chords 40
   
   I. On the major Perfect Chord and on its derivatives, 40
   II. On the minor Perfect Chord and on its derivatives, 42
   III. On the Seventh Chord constructed by adding a minor Third to the major Perfect Chord and on its derivatives, 42
   IV. On the Seventh Chord constructed by adding a minor Third to the minor Perfect Chord and on its derivatives, 44
   V. On the Seventh Chord constructed by adding a major Third to the major Perfect Chord and on its derivatives, 46
   VI. On the Seventh Chord constructed by adding a minor Third below the minor Perfect Chord and on its derivatives, 48
   VII. On the diminished Seventh Chord constructed by adding a minor Third to the false Fifth divided harmonically and on its derivatives, 48

9. Remarks on all the preceding Chords 52
10. Remarks on the different Ratios which can be given to a single Chord 53
11. How to relate the Ratios given by the Divisions to the Vibrations and to the Multiplication of Lengths 54

BOOK TWO:
On the Nature and Properties of Chords and On Everything Which May Be Used To Make Music Perfect

1. On the fundamental Sound of Harmony and on its progression 59
2. On the Chords appropriate to fundamental Sounds and on their progression 61
3. On the nature and properties of the Octave 62
4. On the nature and properties of the Fifth and the Fourth 63
5. On the Perfect Cadence, in which the nature and properties of all the Intervals are found 63
6. On the Deceptive Cadence 71
7. On the Irregular Cadence 73
8. On the imitation of Cadences by inversion 82
9. On how to avoid Cadences by imitating them 83
10. On Chords by supposition with which we may also avoid Cadences by imitating them 88
11. On the Fourth and the Eleventh 91
12. On Chords by borrowing with which we may avoid Perfect Cadences by imitating them 93
13. Rule for the progression of Dissonances, derived from the progression of fundamental Chords 95
14. Remarks on the progression of Thirds and Sixths 101
15. On occasions when the Seventh should be suppressed from the Ninth Chord 108
16. On dissonant Consonances, in which the Fourth is discussed together with the false idea of it that exists because of superfluous Rules 110
   
   I. On the source of Dissonance: Which of the two Sounds of an Interval should be considered dissonant, and for which of these two Sounds the Rule about preparing and resolving the Dissonance has been established, 112
   II. Which Chord is the origin of all dissonant Chords; the number of Dissonances and Sounds it contains; what are its limits, 114
   III. How the most beautiful and universal Rule in Music is destroyed by treating the Fourth as a Dissonance when the Bass is syncopated, 118
   IV. On the faults of Authors in establishing Rules of Harmony; on the different sources of these Rules and on the mistakes for which they are responsible, 119
17. On License 123
   I. On the origin of License, 123
   II. On Licenses derived from the Deceptive Cadence, 125
   III. How a Dissonance may be resolved by another Dissonance, 126
   IV. That the Seventh may also be resolved by the Octave, 132
   V. That the Seventh may be accompanied by the Sixth, 136
   VI. On occasions when a Dissonance seems to be prepared by another Dissonance, 137

18. Observations on establishing Rules, in which the method of composing a Fundamental Bass is taught 139
   I. On establishing Rules, 139
   II. On how to compose a Fundamental Bass beneath any kind of Music, 147

19. Continuation of the preceding Chapter, in which it appears that Melody arises from Harmony 152
20. On the properties of Chords 154
21. On the Modes 157
22. On the origin of our liberty to pass from one Mode or from one Key to another 162
23. On the properties of Modes and Keys 163
24. On Meter 164
25. On the usefulness of this new way of indicating different Meters 170
26. On the number of Measures each Air should contain, and on their characteristic Movements 174
27. How to proceed when setting Words to Music 175
28. On Design, Imitation, Fugue, and on their properties 178
29. On those Intervals which should be classified as major and minor; as just or perfect; as augmented and diminished 180

BOOK THREE:
PRINCIPLES OF COMPOSITION

1. Introduction to practical Music 189
2. On the Fundamental Bass 206
3. On the Perfect Chord, with which Composition in four Parts begins 207
4. On the succession of Chords 207
5. On several Rules which must be observed 212
6. On the Seventh Chord 212
7. Remarks on Dissonance 217
8. On Key and Mode 218
9. On how to Modulate harmonically when the Bass is given a diatonic progression 220
10. On the Basso Continuo 226
11. On the progression of the Bass, which simultaneously determines the progression of the Chords; how we may relate a derived Chord to its Fundamental 226
12. Continuation of the Rules drawn from the preceding Example 234
13. On the Perfect Cadence 235
14. On the Leading Tone, and on how all Dissonances are resolved 237
15. On the Eleventh, called the Fourth 239
16. On the Irregular Cadence 240
17. On the different progressions of a Bass which are related to another in such a way that the Harmony in the upper Parts does not change at all 245
18. On how to prepare Dissonances 248
19. At the time when Dissonances cannot be prepared 253
20. A precise enumeration of the different progressions of the Bass, according to the different Dissonances used there 255
21. On the Chord of the Second 260
22. On Keys and Modes in general 263
   I. On major Keys, 263
   II. On minor Keys, 264
23. On how to pass from one Key to another; i.e., on how to Modulate 267
24. Continuation of the Rules contained in the preceding Chapter 270
25. How to know which Chords must be given to the Bass Notes in any progression 273
   I. On Cadences, and on everything related to the conclusion of a Strain, 273
   II. On Imprecise Cadences, 275
   III. How to distinguish the Key in which the progressions of Imprecise Cadences occur, 277
   IV. How to tell whether the Strain will come to rest on the Tonic Note or on the Dominant in a diatonic progression, 283
26. How to use the Seventh on every Note of a Key in a diatonic progression 284
27. How the same Dissonance may occur in several consecutive Chords on different Notes; how it may be resolved by Notes which appear to be foreign 285
28. On all Licenses, beginning with the Deceptive Cadence 289
29. On the Chord of the augmented Fifth 292
30. On the Ninth Chord 294
31. On the Eleventh Chord, called the Fourth 297
32. On the Chord of the augmented Seventh 299
33. On the Chord of the augmented Second and on its derivatives 301
34. On Chromaticism 304
   I. On descending Chromaticism, 304
   II. On ascending Chromaticism, 306
35. On how to make use of everything we have discussed hitherto 309
   I. On the progression of the Bass, 309
   II. On how to use consonant and dissonant Chords, 310
   III. On major Dissonances caused by the Leading Tone, and on the Notes on which
        they may occur, 312
   IV. On minor Dissonances, 313
   V. On those Consonances which should preferably be doubled, 313
   VI. On Meter and Beats, 314
   VII. On Syncopation, 314
36. On Composition in two Parts 317
37. On False Relations 320
38. On how to write a Melody above a Bass 321
39. On ornamented Melody or Supposition 326
   I. On ornamented Melody using consonant Intervals, 326
   II. On ornamented Melody using diatonic Intervals, 329
40. On how to compose a Fundamental Bass below a Treble 331
41. How to compose a Basso Continuo below a treble 341
42. Useful Remarks concerning the preceding Chapter 344
43. Rules to be observed in a Composition in two, three, and four Parts 346
44. On Design, Imitation, and Fugue 348

After these chapters, there are several examples, together with a quintet and various canons.

**BOOK FOUR:**

**Principles of Accompaniment**

1. How to recognize the Intervals from the arrangement of the Keyboard 377
2. On the difference between major and minor Intervals; and between those which are
   perfect and those which are augmented or diminished 380
3. On the Position of the Hand and on the Arrangement of the Fingers 385
4. On how to find Chords on the Keyboard 387
5. Useful Remarks concerning all the Chords 392
6. On Keys and Modes 395
7. On the order which must be followed for the succession of Chords found within the
   Octave of each Key 399
8. General Rules 406
9. On the different Chords which should follow the Seventh Chord when the Bass Note
   remains on the same degree 410
10. On the Chord of the Second 414
11. On Chords of the Sixth 415
12. On the Chord of the augmented Second and on its derivatives 417
13. On Chords by Supposition 418
   I. On the Ninth, 419
   II. On the Chord of the augmented Fifth, 420
   III. On the Chord of the augmented Seventh, 420
   IV. On the Eleventh Chord, called the Fourth, 420
14. Observations on the relations between all the preceding Chords 421
15. On how to prepare and resolve all Dissonances, from which we shall come to know
    the Key in use and the Chords which each Note of this Key should bear 424
    I. On the major Dissonance, 424
    II. On the minor Dissonance, 427
16. On Chromaticism 429
17. Recapitulation of the various successions of Chords 431
18. Rules which are necessary in order to accompany properly 439
19. On how to figure a Basso Continuo, and on how to know which Chords each figure
    denotes 440
20. How to tell which Bass Notes should bear a Chord 442
